Remarks:
1. The unit should be indoor and make sure the ventilation is good.
2. The condensing water pipeline, seawater circulation pump and fitting parts are supplied by customer.
3. There is more than 1m all around the unit for service space, the base is supplied by customer.
4. The equipments should be connected with water pipeline and power supply according to our instructions.
5. Unaccounted is according to our standard, and the others is subject to design.
6. This drawing is only for your reference. The delivery range is subject to contract.

Technical parameter:
- Water inlet temp.: 20°C
- Ambient temp.: 32°C
- Wet bulb temp.: 35°C
- Production capacity: 7.0t/24hr
- Power supply: 3P/380V/50Hz
- Refrigerant: R404A
- Installation power: about 12kW (exclude circulation pump)
- Water consumption: about 84l/h
- Exterior size: about 1479x1150x1368mm
- Running weight: about 11t
